

# RAMPRASAD S M

## Python & Django Developer

+91 93444 96603 | ramprasad.s.m28@gmail.com | LinkedIn | GitHub | Erode, Tamil Nadu

### SUMMARY

Backend-focused Computer Science engineer with hands-on experience building and deploying Django applications, REST APIs, and full-stack web systems. Delivered four independent projects spanning authentication, database design, dashboard analytics, and third-party tool integration. Proficient in Python, SQL, and object-oriented design, with a track record of shipping functional, production-style code across cybersecurity, business analytics, and framework-development domains.

### TECHNICAL SKILLS

|                  |                                                                    |
|------------------|--------------------------------------------------------------------|
| <b>Languages</b> | Python, JavaScript, SQL                                            |
| <b>Backend</b>   | Django, REST API Development, Authentication, CRUD Operations, OOP |
| <b>Frontend</b>  | HTML5, CSS3, Bootstrap, JavaScript                                 |
| <b>Databases</b> | MySQL, SQLite                                                      |
| <b>Tools</b>     | Git, GitHub, VS Code, Nmap                                         |
| <b>Core CS</b>   | Data Structures & Algorithms, Object-Oriented Programming          |

### PROJECTS

#### TRINETRA — Network Security Scanning Dashboard

*Python, Django, Bootstrap 5, SQLite, Nmap*

- Engineered a Django-based cybersecurity dashboard integrating Nmap to automate network vulnerability scanning and enable repeatable risk assessment.
- Implemented secure user authentication, session management, and a scan-history tracking system with SQLite to persist historical vulnerability data.
- Built a risk-analysis module that classified scan results by severity, improving the clarity of security reporting for end users.

*Django REST Framework, JavaScript, Chart.js, MySQL*

#### Halleyx Dashboard — Customer Analytics Platform

- Built a customer order and analytics dashboard using Django REST Framework, exposing backend data through RESTful APIs consumed by a dynamic frontend.
- Implemented KPI cards and interactive Chart.js visualizations to surface real-time business metrics from MySQL-backed datasets.
- Developed CSV upload functionality to ingest bulk order data and added filterable, responsive UI components for analytics views.

#### ConsoleX — Modular Python Application Framework

*Python, Django, OOP, Git*

- Architected a modular Python/Django framework with a configurable, extensible structure to accelerate setup of future web projects.
- Applied object-oriented design principles to create reusable templates and components, reducing duplicate code across modules.
- Version-controlled development using Git and GitHub, maintaining a clean commit history for iterative feature builds.

#### Student Management Portal — Role-Based Web Application

*HTML5, CSS3, JavaScript, PHP, MySQL*

- Developed a role-based web application for student club management, implementing distinct access levels for students and administrators.
- Built a digital On-Duty request and approval workflow with status tracking, replacing a manual paper-based process.
- Integrated automated email notifications to alert users of request status changes in real time.

### INTERNSHIP EXPERIENCE

#### Front-End Development Intern — Techovolt, Coimbatore

- Built responsive, cross-browser web pages using HTML, CSS, and JavaScript, improving UI consistency across devices.
- Translated design mockups into functional, user-friendly interface components for client-facing pages.

#### Machine Learning Intern — RINEX, Bangalore

- Performed data preprocessing and cleaning to prepare datasets for model training pipelines.
- Trained and evaluated machine learning models, gaining applied exposure to end-to-end ML workflows.

### EDUCATION

#### B.E., Computer Science & Engineering — Erode Sengunthar Engineering College

*2023 – 2027*

CGPA: 7.9 | Erode, Tamil Nadu

### ACHIEVEMENTS

- Published 3 original projects on GitHub, maintaining version-controlled, documented codebases.
- Solved 71+ data structures and algorithms problems on LeetCode, strengthening problem-solving and coding efficiency.
- Completed Infosys Springboard certifications in software development fundamentals.
- Participated in 5+ technical workshops and AI-related events to stay current with emerging tools and practices.
